

## ORDERING INFORMATION

- ♦ **DEPOSIT:** A 50% deposit is required for each custom order.
- ♦ **SPECIFY:-** Model
  - Blade Style
  - Preferred Construction: *Heavy Duty, All-Around or Lightweight*
- ♦ Paddle Blades are typically covered with an epoxy bonded coat of 4 oz fiberglass. Carbon cloth is an optional surface coating at an additional \$40 per blade.
- ♦ Include a hand tracing of both hands...the paddle shaft and tee grips are custom carved to fit your hands. My paddle shafts have a well-defined oval that is correctly aligned to the face of the blade for powerful, smooth strokes.
- ♦ **PERSONALIZATION:** Include the exact spelling of the name you choose for personalization, which is bonded on the blade under the fiberglass layer. You may also include a slogan or a name for your paddle, please no obscenities or political statements.
- ♦ **DELIVERY TIME** can be from 3 months to over a year, depending on the time of year as well as the availability of particular woods and/or special materials. By the end of June, the demand is great, and I am typically backordered 6 months through September. I cannot guarantee an exact delivery date for holiday gifts, weddings or birthdays (unless you plan far enough in advance...so plan accordingly). Being a one-man operation, I start the process by actually going into the woods to select the trees for the lumber myself. Creating a paddle requires a lot of time, effort and energy...this is what I do to provide you with the very best, handcrafted product.
